Networks (ISSN: 0028–3045) is published quarterly, one volume per year, by John Wiley & Sons, Inc.
© 1982 by John Wiley & Sons, Inc., 605 Third Avenue, New York, New York 10158. All rights reserved. Reproduction or translation of any part of this work beyond that permitted by Sections 107 and 108 of the United States Copyright Law without the permission of the copyright owner is unlawful. Second-class postage paid at New York, New York, and at additional mailing offices.

The code and the copyright notice appearing at the bottom of the first page of an article in this journal indicate the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients, on the condition that the copier pay for copying beyond that permitted by Sections 107 or 108 of the United States Copyright Law. The per-copy fee for each article appears after the dollar sign and is to be paid through the Copyright Clearance Center, Inc., 21 Congress St., Salem, MA 01970. (The fee for articles published prior to 1978 is $1.00 per article.) This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Such permission requests and other permission inquiries should be addressed to the publisher.

Subscription price (1983): $85.00 per volume. Postage and handling outside U.S.A.: $15.00 by surface; $55 by air. Please allow four weeks for change of address. Back volumes, microfilm, and microfiche are available for previous years. Request price list from publisher. Claims for undelivered copies must be made no later than three months following month of publication. Missing copies will be supplied when losses have been sustained in transit and where reserve stock will permit.

The contents of this journal are indexed by the following: *Compumath, Computers and Control Abstracts, Computing Reviews, Current Contents/Engineering Technology and Applied Sciences, Electrical and Electronic Abstracts, and Mathematical Reviews.*

Postmaster: Send address changes to Subscription Department, John Wiley & Sons, Inc., 605 Third Avenue, New York, NY 10158.

Manuscripts should be submitted to the Managing Editor: Professor C. L. Suffel. Address all other correspondence to Journals Department, John Wiley & Sons, Inc., 605 Third Avenue, New York, New York 10158.

networks

Contents of Volume 12, 1982

Issue No. 1: Spring

Minimum Cost Flow with Set-Constraints
R. Hassin 1

On the Worst-Case Performance of Some Algorithms for the Asymmetric Traveling Salesman Problem
A. M. Frieze, G. Galbiati, and F. Maffioli 23

Counting Formulas for Tree Growth Plans
H. E. Rowe and W. L. Mammel 41

The General Multimodal Network Equilibrium Problem with Elastic Demand
S. Dafermos 57

Locating Mobile Servers on a Network with Markovian Properties
O. Berman and A. R. Odoni 73

Book Review

Algorithms for Network Programming, by J. L. Kennington and R. V. Helgason
Reviewed by J. G. Klincewicz 87

Issue No. 2: Summer

Finding a Minimum Equivalent Graph of a Digraph
S. Martello and P. Toth 89

Aggregation and Disaggregation in Convex Network Problems
P. H. Zipkin 101

On Reliability in Stochastic Graphs
O. Frank and W. Gaul 119

Generalizations of Planar Graphs
R. E. Erickson 127

A Network Flow Solution to Some Nonlinear 0-1 Programming Programs, with Applications to Graph Theory
J.-C. Picard and M. Queyranne 141

A Decomposition Algorithm for Locating A Shortest Path Between Two Nodes in a Network
J. J. Jarvis and S. Tufekci 161

Minimum Width 2-Layer Layout of a Multichanneled System
M. Cutler and Z. Riesel 173
An Algorithm for the Equilibrium Assignment Problem with Random Link Times
Y. Sheffi and W. B. Powell 191

Book Reviews
Fundamentals of Network Analysis, by D. T. Phillips and A. Garcia-Diaz
Reviewed by P. H. Zipkin 209
Regenerative Simulation of Response Times in Networks of Queues, by D. L. Iglehart and G. S. Shedler
Reviewed by S. Albin 210

Issue No. 3: Fall

Decentralized Maximum-Flow Protocols
A. Segall 213
An Optimal 2-FT Realization of Binary Symmetric Hierarchical Tree Systems
C. L. Kwan and S. Toida 231
Maximum Flow in Networks with a Small Number of Random Arc Capacities
J. E. Somers 241
Modular Decomposition and Reliability Computation in Stochastic Transportation Networks Having Cutnodes
A. W. Shogan 255
The Complexity of Finding Maximum Disjoint Paths with Lengths Constraints
A. Itai, Y. Perl, and Y. Shiloach 277
Double-Row Planar Routing and Permutation Layout
S. Tsukiyama and E. S. Kuh 287
On Balance in Group Graphs
F. Harary, B. Lindström, and H.-O. Zetterström 317
An Algorithm for the Steiner Problem in Graphs
M. L. Shore, L. R. Foulds, and P. B. Gibbons 323
The Generalized Diameter of a Graph
C.-K. E. Chen and R. S. Garfinkel 335

Realizability of p-Point, q-Line Graphs with Prescribed Point Connectivity, Line Connectivity, or Minimum Degree
F. T. Boesch and C. L. Suffel 341

Book Reviews

Network Flow Programming, by P. A. Jensen and J. W. Barnes
Reviewed by C. L. Monma 351

Optimization: Theory and Applications, by S. S. Rao
Reviewed by E. Rosenberg 352

Issue No. 4: Winter

Topological Design of Centralized Computer Networks—Formulations and Algorithms
B. Gavish 355

A 1-Matching Blossom-Type Algorithm for Edge Covering Problems
K. G. Murty and C. Perin 379

Networks Immune to Isolated Line Failures
A. M. Farley and A. Proskurowski 393

On a Measure of Communication Network Vulnerability
G. Exoo 405

An Efficient Algorithm for K Shortest Simple Paths
N. Katoh, T. Ibaraki, and H. Mine 411

Circular Permutation Graphs
D. Rotem and J. Urrutia 429

Polynomial Algorithms for Estimating Network Reliability
E. Zemel 439

A Matroid Related to Finitely Chainlike, Countably Infinite Networks
A. C. Tucker and A. H. Zemanian 453

Efficient Algorithms for Interval Graphs and Circular-Arc Graphs
U. I. Gupta, D. T. Lee, and J. Y.-T. Leung 459

A Property Regarding Degenerate Pivots for Linear Assignment Networks
M. S. Bazaraa and H. D. Sherali 469

An Advanced Dual Incremental Network Algorithm
S. R. Schmidt, P. A. Jensen and J. W. Barnes 475

Determining Minimal Cuts with a Minimal Number of Arcs
H. Hamacher 493
